**RE: Stakeholder Participation in  
Colorado TENORM Report**

To Colorado TENORM Stakeholders:

CDPHE indicates that your company may be a stakeholder in the Colorado TENORM (technologically enhanced naturally occurring radioactive materials) regulatory process. Rule Engineering, LLC was selected by CDPHE to prepare a Colorado TENORM Report required by the state legislature (SB 18-245) incorporating stakeholder input.

Rule Engineering is asking what level of participation you would like to have in the report process. The range of participation you might consider includes:

- Personal interview,
- On-site description of radiological waste management,
- Provide existing NORM and TENORM characterization, quantity and cost data on wastes,
- Provide existing radiological safety data,
- Participate in a written survey regarding potential TENORM wastes,
- Other input, please specify.

Rule will be collecting stakeholder input from now through January 2019, and would like to initiate this process with you as soon as possible.

Please contact Frank Rukavina at 303-350-0606 ([firbrew@comcast.net](mailto:firbrew@comcast.net)) or Mike Brown at 303-431-8500 ([mbrown@ruleengineering.com](mailto:mbrown@ruleengineering.com)) to let us know your level of interest in contributing to this report and provide your appropriate contact information.

Thank you for your response:

*Michael A. Brown*
